## Fish and chips CSS003

Pre-heat some vegetable oil in a wok or pot, at least about 6cm deep. Drop a little batter in the oil to test, if it crisps up quickly, the oil is ready to use. Coat the fish with flour and dunk it in the batter, then drop the fish away from yourself in the oil, Fry until golden and the fish is floating on the surface. Remove and drain on kitchen paper. Let the oil come back to heat and deep-fry the chips until golden and crisp, drain, season well and serve.
